

Catalog #: 211302

Recombinant Anti-human CD27 Antibody

Mouse IgG2a NullFc™

Product Details

Target	Human CD27 (TNFRSF7, T14, S152)
Immunogen	Human CD27 (accession NP_001233.2) recombinantly expressed on HEK293 cells
Species Reactivity	Human, cynomolgus monkey (<i>Macaca fascicularis</i>)
Original Host Species	Rabbit
Ig Type	Mouse IgG2a/kappa with NullFc™ (compatible with standard anti-mouse secondary reagents)
Size	100 µg
Concentration	0.5 mg/ml
Production	Transient transfection expression system in mammalian HEK293 cells
Purification	Protein A affinity chromatography
Formulation	PBS pH 7.2 with 0.08% sodium azide
Storage	4° C for up to 3 months, for longer storage aliquot and store at -20° C
Discovery Method	Rabbits were immunized with HEK293 cells expressing human CD27, and antigen positive B cells were single cell sorted. The variable domain sequences were cloned, sequenced and subcloned into expression vectors containing the various species and isotype constant domains

Verified Applications

Flow Cytometry	Suggested dilution: 1:100 (5 µg/ml final), however optimal concentration for usage may vary and should be determined by user
